

Hi there!

Łukasz Cysewski

Fullstack Developer

I specialize in building modern and practical web applications. I work primarily with Laravel, Vue, PHP 8+, and MySQL, creating projects – from SaaS platforms to e-commerce solutions – that help businesses operate more efficiently. I combine a strong technical foundation with an openness to the needs of both clients and the team. I value clear communication and solutions that support long-term development and easy maintenance. I’m looking for an environment where clean code, thoughtful decisions, and a collaborative team truly matter.

Work Experience

Fullstack Developer

Web24 • August 2023 – Present

- Development and maintenance of web applications (Laravel + Vue) throughout the full project lifecycle — from requirements analysis to deployment and support.
- Designed system architecture, implemented scalable features, and integrated APIs (including OpenAI and payment systems).
- Collaborated with clients, prepared technical and user documentation, and presented development progress.
- Onboarded new developers, participated in code reviews, and contributed to standardizing development workflows.
- Managed DNS and email infrastructure, including cross-server migrations.
- Bhpsoft:
 - Developed a subscription payment system and a feature toggle mechanism.
 - Built a training materials management module.
 - Redesigned the platform’s frontend layout.
- Kamiński Configurator:
 - Created intelligent forms integrated with the OpenAI API.
 - Designed a customizable question tree for dynamic form generation.
- Delivered over 10 end-to-end projects — from scoping and planning to final deployment.

Intern – Fullstack Developer

Web24 • February 2023 – May 2023

- Supported the development team in building the Bhpsoft SaaS platform — implemented new features and assisted in testing.
- Contributed to the organization and improvement of the application versioning process, streamlining the release cycle.
- Implemented a queue-based server notification system, significantly improving response time.

Education

- **Gdańsk University of Technology**
Bachelor of Science in Computer Science
October 2023 – February 2027
- **ZSChiE Gdynia**
IT Technician – Software Development
September 2019 – June 2023

Backend

Laravel PHP 8+ MySQL

Frontend

Vue Nuxt SCSS jQuery
JavaScript

Languages

- Polish (native)
- English (C1)

● Trainee

Web24 • November 2022 – December 2022

- Assisted the development team in enhancing the Bhpsoft SaaS platform — performed coding tasks and supported feature testing.

● Programming Instructor (Scratch / Python)

Kodland • May 2022 – October 2022

- Conducted remote programming classes for children aged 7–12 using Scratch and Python.
- Prepared educational materials and provided technical support during lessons.
- Successfully led a 10-student group through a full semester, equipping them with a solid foundation in programming.

● Trainee

Web24 • January 2022 – February 2022

- Developed a system for generating branded email signatures as an installable package.
- Integrated the solution with the company's internal CMS used for building client websites.

Skills

- Client communication: gathering requirements, presenting progress updates, and providing post-deployment support.
- Task estimation and preparation of project cost assessments.
- Writing technical documentation (for the team) and user guides (for clients).
- Debugging and optimizing applications at both the backend and frontend levels.

Projects

● Bhpsoft (bhpsoft.pl)

Technologies: Laravel, Vue

- Ongoing development and maintenance of a platform serving dozens of clients and thousands of users.
- Delivered modules: company management system, training materials library, and a modular architecture with customizable features per client.

● Metamistic (metamistic.com)

Technologies: Laravel, Vue, Laravel Nova

- End-to-end development and deployment of a web platform.
- Built a dynamic, responsive user interface aligned with modern UX/UI standards.

● Ibu (ibu.pl)

Technologies: Nuxt, Strapi
